Board Approves Weekly Treatment

Due to the influx of gophers in the greenbelt, bi-weekly service is just not working.

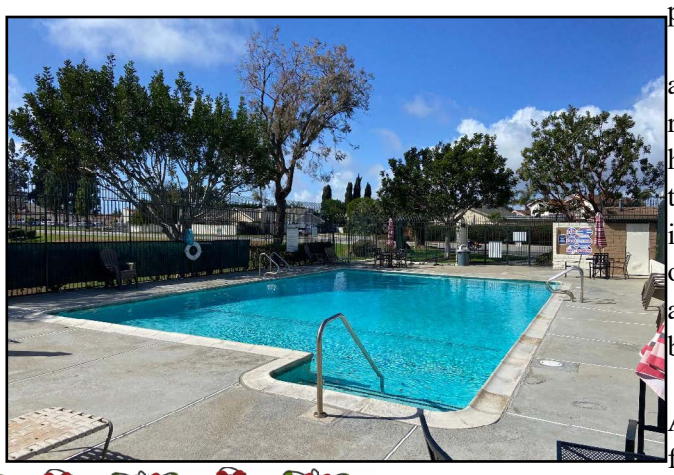

The Board approved to begin weekly service to try to minimize them throughout the park. With their being so much gopher activity in surrounding areas, we understand that we won't be able to completely eliminate the gophers, but we are hoping to cut down on the damage the critter cause.

Board of Directors Approved Pine Tree Treatment, Annual Tree Trimming

Adult Pool to Have Chemical Automation Systems Added to Pool System

Now that the Adult Pool heater has been turned off for the season, the Board of Directors approved to install the chemical automation system that the other two pools have. Since this pool has never had the system before, it will have to have some major plumbing done prior to installation.

The system injects chemicals (chlorine and acid) into the pool upon demand, rather than added manually. When it is hot outside and there are many people in the pool, it needs more chemicals to keep it in the desired range. When it is cooler outside and not as much pool usage, not as many chemicals are needed for proper balance.

This system will then be added to the Association's Capital Reserve Report for future service.

SIFTING THROUGH THE "NOISE"

The Real Estate Market has been going through some changes, as it always is.
Lately, there has been a lot of negativity, helped along by the media. A lot of "Noise".
The sky is not falling! There is opportunity in this market for Buyers as well as Sellers.
Please call, text or email me for the latest CORRECT information on the Real Estate Market. You need correct information to base decisions on.
Also, you need a trusted advisor, not an agent that sees you as one of their "Year-End Stats" to brag about how many houses they sold.
Please allow me to be that Trusted Advisor to you.

Board Approves Turf Trial Sites

The soil in the greenbelt on the north side of Slater, near the Adult Clubhouse has been tested to determine why the grass will not grow in this area. The salinity levels are off the charts. The area was treated and retested, but it still has highly elevated salt levels.

Another issue with the grass is that the streets north of Slater drain into the park when the gutters are full, bringing with it all of the oils, pesticides, soaps, etc. Even though the drains have been cleaned out throughout the greenbelt, the park is designed to collect all the overflow.

The Board approved to have O'Connell rototill, add supplements and seed one area and turf the other area to see if we can get grass to grow. If one of these options will work, then a plan can be devised to plant sections at a time.

So, when you see a couple of areas sectioned off with yellow tape, please stay out as they are the test areas. It will take lots of water at the beginning to encourage growth, so please be mindful if you are in the park.

A Super El Nino is Forecasted - Please Remove the Grass & Weeds from the Sidewalk & Gutter Surrounding Your Property

Take a few minutes to walk the perimeter of your property and remove any grass, leaves or weeds from the sidewalk and gutter. Not only does it make your property look manicured and stops trip hazards, it also allows water to flow freely through the gutters system and alleviates pooling which can cause a nesting spot for mosquitoes.

If you have a gardener, ask them to please remove the weeds. Not only will your neighbors appreciate it, but it will stop the spread of weeds to adjacent areas.

Thank You from all of Green Valley for cleaning up your property! Together we can make a difference.

Fountain Valley inventory is rising, which is good news! Historically FV has a lower number of homes for sale than neighboring cities. **Why? Fountain Valley is a GREAT place to live! Why are homeowners staying put?** Their low mortgages. 84% of California homeowners have a fixed mortgage rate of 5% or lower. High mortgage rates prevent many would-be sellers from selling their home and keep buyers out of the market.

Coyote Spotted in Greenbelt During the Day in October -- Safety Tips

- Keep a close eye on small children when outdoors.
- Keep small pets inside, particularly at dawn and dusk when coyotes are most active.
- Keep pets on a short leash when walking.
- Keep pet food and water dishes inside.
- Secure food and trash at all times and remove all sources of water.
- Pick up fallen fruit.
- Sweep up fallen birdseed, which can attract mice and rats, a common food source for coyotes.
- Remove brush, wood piles and debris where rodents are abundant and coyotes can find cover.
- Install motion-activated lighting or sprinklers.
- If a coyote approaches or acts aggressively, throw rocks, make noise, look big, and pick up small children and pets. Do not turn your back on the coyotes.

- If a coyote is frequently seen around schoolyards or playgrounds or is acting aggressively, contact animal control or the police department.
- If a coyote attacks, call 911.
